

Airport Permitting

Amended Permits

Pursuant to PUC 21664.5, an Amended Airport Permit is required for expansions of existing airports. Proponents must submit Department Form DOA-0103, Amended/Corrected Airport Permit - Application and provide the same information and documentation as needed for initial airport permitting (see Site Approval Section). Airport expansions include the following:

- 1) The acquisition of Runway Protection Zones (RPZs), as defined in the FAA Airport Design Guide (Advisory Circular 150/1500-13), or of any interest in land for the purpose of any other expansion as set forth below.
- 2) The construction of a new runway.
- 3) The extension or realignment of an existing runway.
- 4) Any other expansion of the airport's physical facilities for the purpose of accomplishing or which are related to the purpose of paragraph 1, 2, or 3.
